

Agile Visualization

Bergel

Agile Visualization covers aspects that are relevant for practitioners, businesses, and academics to successfully design and implement highly interactive visualizations.

Roassal is a script system for advanced interactive visualizations, distributed under the MIT License. Material provided in the book is primarily made for Roassal.

Roassal is implemented using **Pharo**

Pharo MOOC

Cassou - Ducasse
Fabresse

Pharo Mooc is a set of videos, exercises, challenges, and miniprojects. *Pharo Mooc* is fully dubbed in french and english. It comes with subtitles in Japanese, english, french and spanish.

This web site contains all the material of this Mooc in free access.

In addition, in average every 18 months the Mooc is proposed and run on the France Université Numérique platform with versions in English and French.

Learning Object-Oriented Programming, Design and TDD with Pharo

Ducasse - Pollet

I would like to present the concepts that I want to teach you and that hopefully you should acquire. What is key to understand is that I will focus on the "key" conceptual elements. It is easy for me because I will not explain OOP/D in general but within the context of Pharo. Pharo is the essence of Object-Oriented programming since its object model is minimal but it covers the key and essential aspect of OOP. For example we will not present method modifiers, types, overloading (which is a bad concept).

We center a lot in:

- Tests
- Refactorings
- Polymorphism and Code Reuse

Deep into Pharo

Bergel - Cassou
Ducasse - Laval

Pharo is a clean, innovative, open-source, live-programming environment.

Deep into Pharo is the second volume of a series of books covering **Pharo**.

Whereas the first volume **Pharo by Example** is intended for newcomers, this second volume covers deeper topics.

There is a third book in the series **Enterprise Pharo**

Including:

- Getting Pharo by Scripts
- Files and Filesystems
- Sockets
- Settings
- Regular Expressions
- Projects & Versionning
- Pharo Internals
